Let's Go on a Science Safari!

*Explore Interactive Exhibits
Celebrating Math and Science Education*

Friday, March 21, 2168 Rayburn HOB (Gold Room), 10:00-3:00

Dear Colleague,

The Office of Science and Technology Policy (OSTP) of the Executive Office of the President is joining representatives from public and private organizations to produce an interesting, interactive exhibit for the benefit of Members and staff in conjunction with Excellence in Science, Technology, and Math Education (ESTME) Week.

ESTME Week focuses awareness on the need to excite K-12 students about the wealth of opportunities for discovery and exploration afforded through math and science education. The Department of Energy's Office of Science and the Albert Einstein Distinguished Educator Fellows will, during ESTME Week, showcase math/science education, and their talents in making these subjects interesting and relevant to their students. They will present, in the form of a "Science Safari", a number of interactive, informative, and fun activities that will be of interest to students, teachers and parents. The Safari will consist of twelve stations where participants can play with plastics at a polymer table, run a remote control hydrogen powered truck, participate in interactive demonstrations, etc.

We invite all Members and staff to attend this event in the Gold Room of the Rayburn House Office Building between 10:00 am and 3:00 pm on Friday, March 21, 2003. We hope that you will all have time to drop by and visit the "Science Safari" stations during these hours and show these educators how much you appreciate their efforts in working with America's youth.

Sincerely,

Rep. Ruben Hinojosa

Rep. Ralph Hall

Rep. Vernon Ehlers

Rep. Rush Holt
